Project Brief

Our clients brief was simple; to create a home with family areas that could be shared, whilst providing individual space for each of their children as they got older. It was also important to them that their home have a certain uniqueness that would set it apart from other homes in the area.

The Result

Our clients couldn't be happier with the result. Their home now boasts four bedrooms, and rivals other homes in size and features. The innovative and successful use of space allows their family to connect together the way they had always imagined.

Client Comments

'The project was well organised and the weekly face to face meetings were great for us to catch up with our supervisor to check on progress.'
