

– Project Showcase Series

Location:	Woollahra
External Finishes:	Brick Veneer & Harditex
Rooms Added:	Master Bedroom with Ensuite and Balcony

Project Brief

The clients love where they live. For them, it is the perfect location and their home had so many positive aspects they were not prepared to part with it. They just needed more space, so they decided it was time to renovate. The brief was to retain the heritage facade on the exterior of the house while modernising the interior and to maximise space and provide an uninterrupted flow to the back of the house and out into the courtyard.

The Result

The first floor addition provides a very spacious and light filled environment where the client can retreat from the main living area of the house. Featuring the master bedroom with a luxurious ensuite, we see the continuation of the modern styling combined with quality fixtures and finishes. The inclusion of a small balcony at the end of the master bedroom provides an interesting architectural focal point in the bedroom and connects this space to the world outside. This level also features the innovative addition of an attic room providing an additional space to accommodate guests.

Client Comments

'Our supervisor was great. We actually moved out of the house for 7 months during the construction and he kept us informed and updated every step of the way. Nothing was ever a problem and even now after the renovation is finished he is still happy to help us out with any questions or issues we may have.'
