| Location: | Canada Bay |
| External Finishes: | Brick Veneer and Weatherboard |
| Rooms Added: | Master Bedroom with WIR, Ensuite, Sitting Room and Study |

Project Brief

Living in a heritage area, the clients had very strong ideas as to what they wanted. They were very particular about how the façade of the house was to look within the streetscape, along with maintaining all the heritage character they originally liked about the house when they first bought it. So, when they started looking for a company to work with, it was important to find someone who had experience of building in the area and working to a similar brief.

The Result

The innovative design and attention to detail have created a stylish and more functional family home. The clients were very impressed by the final result, with their home now boasting four bedrooms, two bathrooms, two living areas, media room and a spacious study. The house has not only retained its heritage ancestry; it has also transformed into a stunning house that stands proud among the other heritage homes in their area.

Client Comments

'Every time we come home, or as we are looking from across the street and seeing the house like it is now, it's pretty phenomenal. We can't believe it's actually the same house and that we live there. Cape Cod did an outstanding job!'
