

– Project Showcase Series

Location:	Woollahra
External Finishes:	Weathertex and Brick Veneer
Rooms Added:	Master Bedroom with WIR and Ensuite, 2nd, 3rd Bedroom, and Main Bathroom

Project Brief

Owners Tania and James wanted to future-proof their family home by opening up the rear of their house to create an open-plan living/kitchen/dining area, along with a first floor addition to add a master suite with walk-in robe and ensuite, two additional bedrooms and a family bathroom.

The Result

The first floor addition added much-needed space for the whole family including a large master suite, walk-in robe and ensuite, along with two extra bedrooms for the children and a family bathroom along with lots of storage. Clever storage solutions were a bonus for homeowners James and Tania when it came to their renovation, *“That’s one thing we really valued about Cape Cod’s work; we built quite a bit of storage into every room”* adds Tania

Client Comments

“We didn’t want to sacrifice too much garden to get a lot more house, but we kept the garden pretty much as is and got a huge amount more downstairs house, plus the stuff on top. It feels like we doubled the size of our house. The guys did a fantastic job, we can’t commend them enough.”
